

# Due Diligence Memo

**Task ID:** 7aad532d-d403-4eab-9f00-65b31d161eba

## Executive Summary:

As a financial due diligence assistant, I need access to the company's financial statements, specifically the **Statement of Cash Flows**, to answer "What's the cash flow?" Without the actual financial documents (such as 10-K, 10-Q filings, or internal financial reports), I cannot provide a specific numerical value for the company's cash flow. To perform my analysis, I would need to extract and understand:

- Net Cash Provided by (Used in) Operating Activities:** This indicates the cash generated from the core business operations. It's a key input for assessing operational health and, after adjustments for CapEx and changes in working capital, forms the basis of Free Cash Flow to Firm (FCFF) or Free Cash Flow to Equity (FCFE) for DCF valuation.
- Net Cash Provided by (Used in) Investing Activities:** This reflects cash movements related to the purchase or sale of long-term assets, investments in other companies, or capital expenditures (CapEx), which is crucial for DCF modeling.
- Net Cash Provided by (Used in) Financing Activities:** This shows cash flows related to debt, equity, and dividends.

Please provide the relevant financial statements or a data extract containing these figures so I can proceed with the cash flow analysis and subsequent valuations.

## Key Metrics:

- revenue\_growth: None
- debt\_equity\_ratio: None
